*CANDIDATE FOR THE POST OF VISITING
PHYSICIAN TO THE VICTORIA INFIRMARY*

MacLehose, Glasgow

APPLICATION AND TESTIMONIALS

IN FAVOUR OF

J. CAMPBELL M'CLURE,
M.D. (Glasgow)

SENIOR ASSISTANT TO THE REGIUS PROFESSOR OF MEDICINE, GLASGOW UNIVERSITY

JOINT SENIOR DISPENSARY PHYSICIAN, WESTERN INFIRMARY, GLASGOW

DISPENSARY PHYSICIAN, ROYAL HOSPITAL FOR SICK CHILDREN, GLASGOW

BACTERIOLOGIST, OPHTHALMIC INSTITUTION, GLASGOW ROYAL INFIRMARY

*CANDIDATE FOR THE POST OF VISITING
PHYSICIAN TO THE VICTORIA INFIRMARY*

9 NEWTON PLACE,
GLASGOW, W., *May 24th*, 1909.

LADIES AND GENTLEMEN,

I have the honour to present myself as a candidate for the post of Visiting Physician to the Victoria Infirmary, vacant by the resignation of Dr. Ebenezer Duncan, on his appointment as one of the Board of Management.

I am thirty-six years of age, graduated M.B., C.M. at the University of Glasgow in 1896, and took the degree of M.D. in April of this year.

During the year following my graduation in 1896, I held the posts of House-Physician to Dr. G. P. Tennent and House-Surgeon to the late Professor George Buchanan in the Western Infirmary. Immediately thereafter I went to Berlin, where I studied Bacteriology in the Hygienic Institute under Professor Günther, and also attended many of the medical clinics in the Charité Hospital. On my return from Germany, after a stay of nine months, I was appointed by the late Dr. J. B. Russell, then Medical Officer of Health for Glasgow, as pupil assistant in the Sanitary Office, where I gained much valuable experience in the management of disease from the Public Health standpoint. At the end of my term of six months in the Sanitary Office I joined the staff of the Fever Hospital at Belvidere, and remained there for two years and six months, occupying successively the position of Resident Assistant Physician, Superintendent of the Small-pox Hospital, and, finally, during the last year of my residence, that of

Digitized by the Internet Archive
in 2016

<https://archive.org/details/b24933314>

Senior Resident Assistant Physician and Assistant Superintendent. My experience in Belvidere was unusually varied, both from a clinical and administrative point of view, as, besides the ordinary acute fevers, I had personal charge of Typhus, Small-pox, and Bubonic Plague. In the autumn of 1901 I was elected Indoor House-Surgeon to the Glasgow Maternity Hospital, where I remained for the statutory period of three months, at the end of which I entered upon private practice as a Physician.

In January, 1902, I became Clinical tutor under Professor Samson Gemmell at the Western Infirmary, and two years later became his official assistant at the University. In the same year I was also appointed to the Dispensary Staff of both the Western Infirmary and the Royal Hospital for Sick Children, Glasgow.

During the past winter I have been engaged in research work in the Physiological Laboratory of Glasgow University under Professor Noel Paton, my work having particularly to do with feeding and metabolism, and also with clinical chemistry, such as is necessary for the proper treatment and diagnosis of so many of the more obscure cases which are met with in Hospital.

I have thus since graduation endeavoured to train myself in the broadest possible way as a Physician studying disease in its clinical, pathological, and Public Health aspects, and I have, moreover, been continuously engaged in teaching Medicine for the last seven years, both as Professor Gemmell's assistant and in the Dispensary of the Western Infirmary, where, besides the ordinary teaching required for the position, I have for the past four years, conducted an extra out-door clinique in Medicine on Saturday mornings, which has been largely attended by students in their final year. In the ordinary course of duty at the Western Infirmary I have from time to time taken full charge of Medical Wards, and for upwards of two years I was in charge of the Medical Ward in the Country Branch of the Sick Children's Hospital.

I am, therefore, thoroughly conversant with the management of Medical Wards in a large Hospital, and my experience in the teaching of students has been considerable, both in Hospital, at the University, and also in Anderson's College, where I have delivered lectures on certain of the acute fevers at the request of Dr. Cowan, the Professor of Medicine in that School.

In conclusion, I may say that I practise solely as a Consulting Physician, and do not engage in general practice.

Principal Sir Donald MacAlister, K.C.B., has kindly permitted me to use his name as a reference.

I append a list of Published Papers and Testimonials in favour of my candidature, and have the honour to remain,

LADIES AND GENTLEMEN,

Your obedient Servant,

J. CAMPBELL M'CLURE.

*From SIR HECTOR C. CAMERON, Professor of Clinical
Surgery in the University of Glasgow.*

18 WOODSIDE CRESCENT,
GLASGOW, May 21st, 1909.

DR. J. CAMPBELL M'CLURE is, I believe, about to become a candidate for the vacant post of Physician to the Victoria Infirmary, and he has asked me to express an opinion as to his fitness for such an office.

I do so with pleasure and confidence, because I feel, from what I know of his professional life hitherto, that he cannot be otherwise than thoroughly well qualified to fulfil all the duties of Visiting Physician to a General Hospital.

His career up to the present has evidently been planned as a careful preparation for the performance of such duties. His time has been devoted very largely to Hospital work. Thus he has acted for the last seven years as assistant to Professor Gemmell, and at the same time as one of the Physicians of the Out-door Department of the Western Infirmary. He has, moreover, cultivated with great zeal and industry pathological and bacteriological science in their bearing on the Practice of Medicine.

It is from the ranks of men who have so prepared themselves—and from such only—that the staff of a Hospital should be recruited; and I commend Dr. M'Clure's claims warmly to the consideration of those with whom the appointment rests.

HECTOR C. CAMERON.

*From SAMSON GEMMELL, M.D., F.F.P.S.G., Regius
Professor of Medicine, Glasgow University; Physi-
cian to the Western Infirmary and Royal Hospital
for Sick Children, Glasgow.*

17 WOODSIDE PLACE,
GLASGOW, W., May 24th, 1909.

I HAVE known DR. J. C. M'CLURE long and intimately—indeed for some years he has been constantly under my observation—and I am well entitled to speak as to his qualifications for the post which he now seeks to secure in the Victoria Infirmary.

During his whole medical career he has devoted himself exclusively to the study of Medicine in its theoretical and practical aspects, sparing neither time nor trouble to render himself thoroughly conversant with the manifestations and treatment of disease in all its phases. In the Dispensary and Wards of the Western Infirmary he has had a wide field of study, which he has utilized to the utmost; and the result is that among the younger members of the Profession I know few, if any, so accomplished or so fitted to undertake the duties of Visiting Physician to a Hospital. His ample knowledge, his careful and patient method of enquiry, and his sound and solid judgment, mark him out as one specially fitted for such a post, and lead me to augur for him a very successful career.

During the last seven years he has been very intimately associated with me as Assistant in the conduct of the classes of Medicine and Clinical Medicine in Glasgow University. He has thus had abundant experience in the instruction of students, and I cannot speak too highly of the manner in which he has discharged his duties.

His intimate knowledge of the latest developments of medical science and his powers of exposition, have contributed not a little to the successful conduct of these classes; and I have often had occasion to acknowledge my indebtedness to him in this respect. At the present time—when the University Court is negotiating for a wider field of clinical instruction for the students—it is of the utmost importance that the appointments to the Glasgow Hospitals other than the Western should be held by those who are not only accomplished Physicians, but have the ability and desire of imparting their knowledge to others; and these qualifications Dr. M'Clure has in a high degree.

He is a willing and pleasant fellow-worker; and I cannot doubt that the wider sphere which would be opened to him as Physician to the Victoria Infirmary would increase not only his own reputation but that of the Institution with which he had become connected.

I therefore recommend him with the utmost confidence to the Managers of the Victoria Infirmary, fully conscious that he will discharge any duties committed to him with ability, zeal, and distinction.

SAMSON GEMMELL.

*From RALPH STOCKMAN, M.D., F.R.C.P. (Edin.),
F.F.P.S.G., F.R.S.E., Professor of Materia Medica
and Therapeutics in the University of Glasgow;
Visiting Physician and Lecturer on Clinical Medi-
cine, Western Infirmary, Glasgow.*

MATERIA MEDICA DEPARTMENT,
UNIVERSITY OF GLASGOW, 22nd May, 1909.

I HAVE much pleasure in supporting the application of DR. JAMES CAMPBELL M'CLURE for the post of Physician to the Victoria Infirmary. He has for many years past been occupied in fitting himself for such a position, and I can testify to his possessing a sound clinical and scientific knowledge of his professional work. He is an accomplished bacteriologist, and a good physiological and pathological chemist. He has had, in addition, very considerable experience in teaching clinical medicine. In all respects I regard him as well fitted to occupy an important position in the Glasgow Medical School, and well worthy of promotion.

RALPH STOCKMAN.

From ROBERT MUIR, M.D., F.R.C.P. (Ed.), F.F.P.S.
(Glasg.), *Professor of Pathology in the University of
Glasgow; Pathologist to the Western Infirmary,
Glasgow.*

PATHOLOGICAL DEPARTMENT,
UNIVERSITY OF GLASGOW.

IN connection with the application of DR. CAMPBELL M'CLURE for the post of Physician to the Victoria Infirmary I have much pleasure in stating the high opinion which I have of his qualifications. During the last ten years I have seen much of him, and I have been much impressed by his marked ability and his excellent knowledge of clinical and pathological methods; and, I may add, by his high personal qualification. Others will no doubt speak more directly as to his clinical gifts, but I may say that I have heard nothing but praise of his work both as a Physician and as a Teacher. He is, in my judgment, a man of wide attainments, thoroughly qualified in every aspect of modern medicine, and one who would devote himself ungrudgingly to the services of the Hospital. I feel certain that if successful in his application he will fill the post with distinction and success.

ROBERT MUIR.

*From D. NOEL PATON, M.D., F.R.C.P. (Ed.), Regius
Professor of Physiology in the University of Glas-
gow.*

PHYSIOLOGICAL DEPARTMENT,
UNIVERSITY OF GLASGOW, 22nd May, 1909.

For the reputation of our Medical School we require hospital physicians not only adequately trained for the work they have to undertake, but with leisure to study and investigate all the cases under their care, not merely in the interest of the individual patients, but with the object of advancing medical knowledge.

For such a post a special training and special qualifications are required. DR. M'CLURE has had such a training, as is shown by his letter of application, and I am convinced that he also possesses the necessary qualifications. He has a sound medical education and a wide clinical experience; and the fact that, in spite of his other duties, he has made time to carry out original investigation in medical science in this department indicates that he has the scientific zeal which should insure that a hospital appointment will be used by him to the best advantage.

I have every confidence in recommending him for the post of Physician to the Victoria Infirmary.

D. NOEL PATON.

*From G. P. TENNENT, M.D., F.F.P.S.G., Consulting
Physician to the Western Infirmary, Glasgow.*

159 BATH STREET,
GLASGOW, May 20th, 1909.

I HAVE special pleasure in giving DR. J. CAMPBELL M'CLURE my heartiest recommendation in his application for the post of Physician to the Victoria Infirmary, Glasgow. Dr. M'Clure's medical education has been unusually complete. After graduating he acted for six months as Resident Physician in charge of my wards in the Western Infirmary, and he then proved himself to be one of the ablest House-Physicians I had been privileged to have associated with me in Hospital work. On leaving the Western Infirmary, Dr. M'Clure attended for nine months many of the medical clinics in Berlin, and at the same time specially devoted himself to the practical work of the bacteriological department under Professor Günther. On returning from Germany he acted for six months with the late Dr. J. B. Russell as his pupil assistant in the Health Office, and for two years and six months was Resident Assistant Physician of the Fever and Small-pox Hospitals at Belvidere. Subsequently he was for three months Indoor House-Surgeon to the Maternity Hospital, and towards the end of 1901 he began practice in Glasgow as a Physician. In January, 1902, Professor Gemmell selected him as Clinical Tutor in connection with his medical clinique at the Western Infirmary, and in 1904 he received from Professor Gemmell the additional honour of being appointed also as his official assistant at the University.

Since 1902 he has held the appointment of Dispensary Physician to the Western Infirmary and the Sick Children's Hospital, and during the last four years he has voluntarily conducted a clinique associated with the work of the Out-door Medical Department of the Western Infirmary, which I know has been much appreciated by the senior students. For some time Dr. M'Clure has retired from visiting practice, so as to concentrate his attention wholly on Hospital, teaching, and consulting work.

There are, in my opinion, few Physicians so eminently accomplished and eligible, by administrative talent and extensive practical experience and training in all the details of Hospital Work and Clinical Teaching, for the appointment Dr. M'Clure now desires to obtain, or who will more worthily discharge its various duties with the highest efficiency.

I feel that I cannot too highly recommend him.

G. P. TENNENT.

From GEORGE A. GIBSON, M.D., D.Sc., LL.D., *Consulting Physician, Deaconess Hospital, Edinburgh; Physician to the Royal Infirmary, Edinburgh; Lecturer on Medicine, Minto House, and on Clinical Medicine, Royal Infirmary, Edinburgh.*

3 DRUMSHEUGH GARDENS,
EDINBURGH, May 20th, 1909.

DR. J. CAMPBELL M'CLURE is so well known and so widely respected that any testimony from me in his favour may well be deemed superfluous. As he has, however, requested an expression of my opinion, I have great pleasure in giving it. For a good many years he has been known to me as one of the ablest men in the West of Scotland, and I have been enabled from frequent personal intercourse, as well as from the communication of others, to form this estimate of him.

During the last seven years he has been engaged in the teaching of Clinical Medicine under my friend Professor Gemmell, and during the last five years he has been the assistant to the Chair of Clinical Medicine. He has in this way thoroughly trained himself in all the methods of modern medical education. As Physician to the Out-patients at the Western Infirmary he has further extended his experience in the teaching of Clinical Medicine, and he has also had ample opportunity of showing how conversant he is with the treatment of disease. From every point of view he has shown himself to be possessed of every attribute of the successful physician. He is, at the same time, a man of high ideals of duty, from which I have never known him in the slightest degree to diverge. It may be added that his geniality of manner and kindness of disposition have endeared him to every rank of society. It is therefore with perfect confidence and sincere pleasure that I desire very strongly to recommend him to the Managers of the Victoria Infirmary.

G. A. GIBSON.

From A. MAITLAND RAMSAY, M.D., F.F.P.S.G., Surgeon to the Ophthalmic Institution, Glasgow Royal Infirmary; Professor of Ophthalmology, St. Mungo's College; Lecturer on Diseases of the Eye, Queen Margaret College, University of Glasgow.

15 WOODSIDE PLACE,
GLASGOW, *May 22nd, 1909.*

DR. CAMPBELL M'CLURE tells me that he is a candidate for the post of Physician to the Victoria Infirmary, and has asked me to say a few words in favour of his application. This I very gladly do. I have known Dr. M'Clure well, ever since he was a medical student, and during the last ten years I have been intimately associated with him in the Glasgow Ophthalmic Institution, where he holds the post of Bacteriologist. In connection with that appointment Dr. M'Clure has occasionally given demonstrations on the Bacteriology of the Eye to my post-graduate students, and in this way I have been led to form a very high opinion of his work as a teacher.

Dr. M'Clure's natural abilities even during his student days marked him out as one of the most brilliant men of his time, and since graduating he has enjoyed exceptional opportunities, both at home and abroad, of preparing for his work as a Physician. He has, moreover, during the whole of his professional career been closely associated with Professor Samson Gemmell and Dr. G. P. Tennent, and has thus had the benefit of their unrivalled clinical experience. No one, therefore, among the younger members of the profession is more fitted to carry on the best traditions of the Glasgow School of Medicine.

If the Directors of the Victoria Infirmary appoint Dr. M'Clure to the post he now seeks, I feel sure that they will have no cause to regret the choice they make, as I know he is both able and willing to use his best endeavours to maintain the high reputation the Infirmary already enjoys.

A. MAITLAND RAMSAY.

*From A. K. CHALMERS, M.D., D.P.H., Medical Officer
of Health for the City of Glasgow.*

SANITARY CHAMBERS,
GLASGOW, *May 24th*, 1909.

DR. CAMPBELL M'CLURE tells me that he is about to become a candidate for the appointment of Visiting Physician to the Victoria Infirmary, and I have great pleasure in supporting his application.

At present he is Chief Assistant to Professor Gemmell at the University and in the Wards of the Western Infirmary, as well as one of the Dispensary Physicians to the Western and to the Royal Hospital for Sick Children, and these appointments may of themselves be regarded as constituting a field of training which specially qualifies him for discharging the duties of the appointment which he now seeks.

In connection with the Dispensary and Country Branch of the Sick Children's Hospital I have had special opportunity of knowing how thoroughly his work has been done, but as I was in even more intimate association with his work for several years before he entered on practice, I may be permitted on that ground to speak more definitely regarding his work at that period.

On his return from Berlin, where he studied Bacteriology and Clinical Medicine in 1898, he joined the Sanitary Department as pupil assistant to Dr. Russell and myself, and after six months he was appointed to the Resident Staff in Belvidere Hospital, where he served for two and a half years. During this period certain cases of Plague attracted a good deal of attention, and

Dr. M'Clure contributed an excellent section on the Clinical Bacteriology of that disease to the Official Report which was subsequently issued.

This and several other published papers sufficiently attest Dr. M'Clure's familiarity with the scientific basis of modern medicine, and afford sure ground for the hope that, with extended opportunity for Clinical Research, he will do still more to advance the reputation of the Glasgow Medical School.

On the basis of his past work, therefore, I have every confidence in recommending his application to the earnest consideration of the Governors of the Victoria Infirmary.

A. K. CHALMERS.

*From DONALD J. MACKINTOSH, M.B., M.V.O., Medical
Superintendent, the Western Infirmary, Glasgow.*

WESTERN INFIRMARY,
May 24th, 1909.

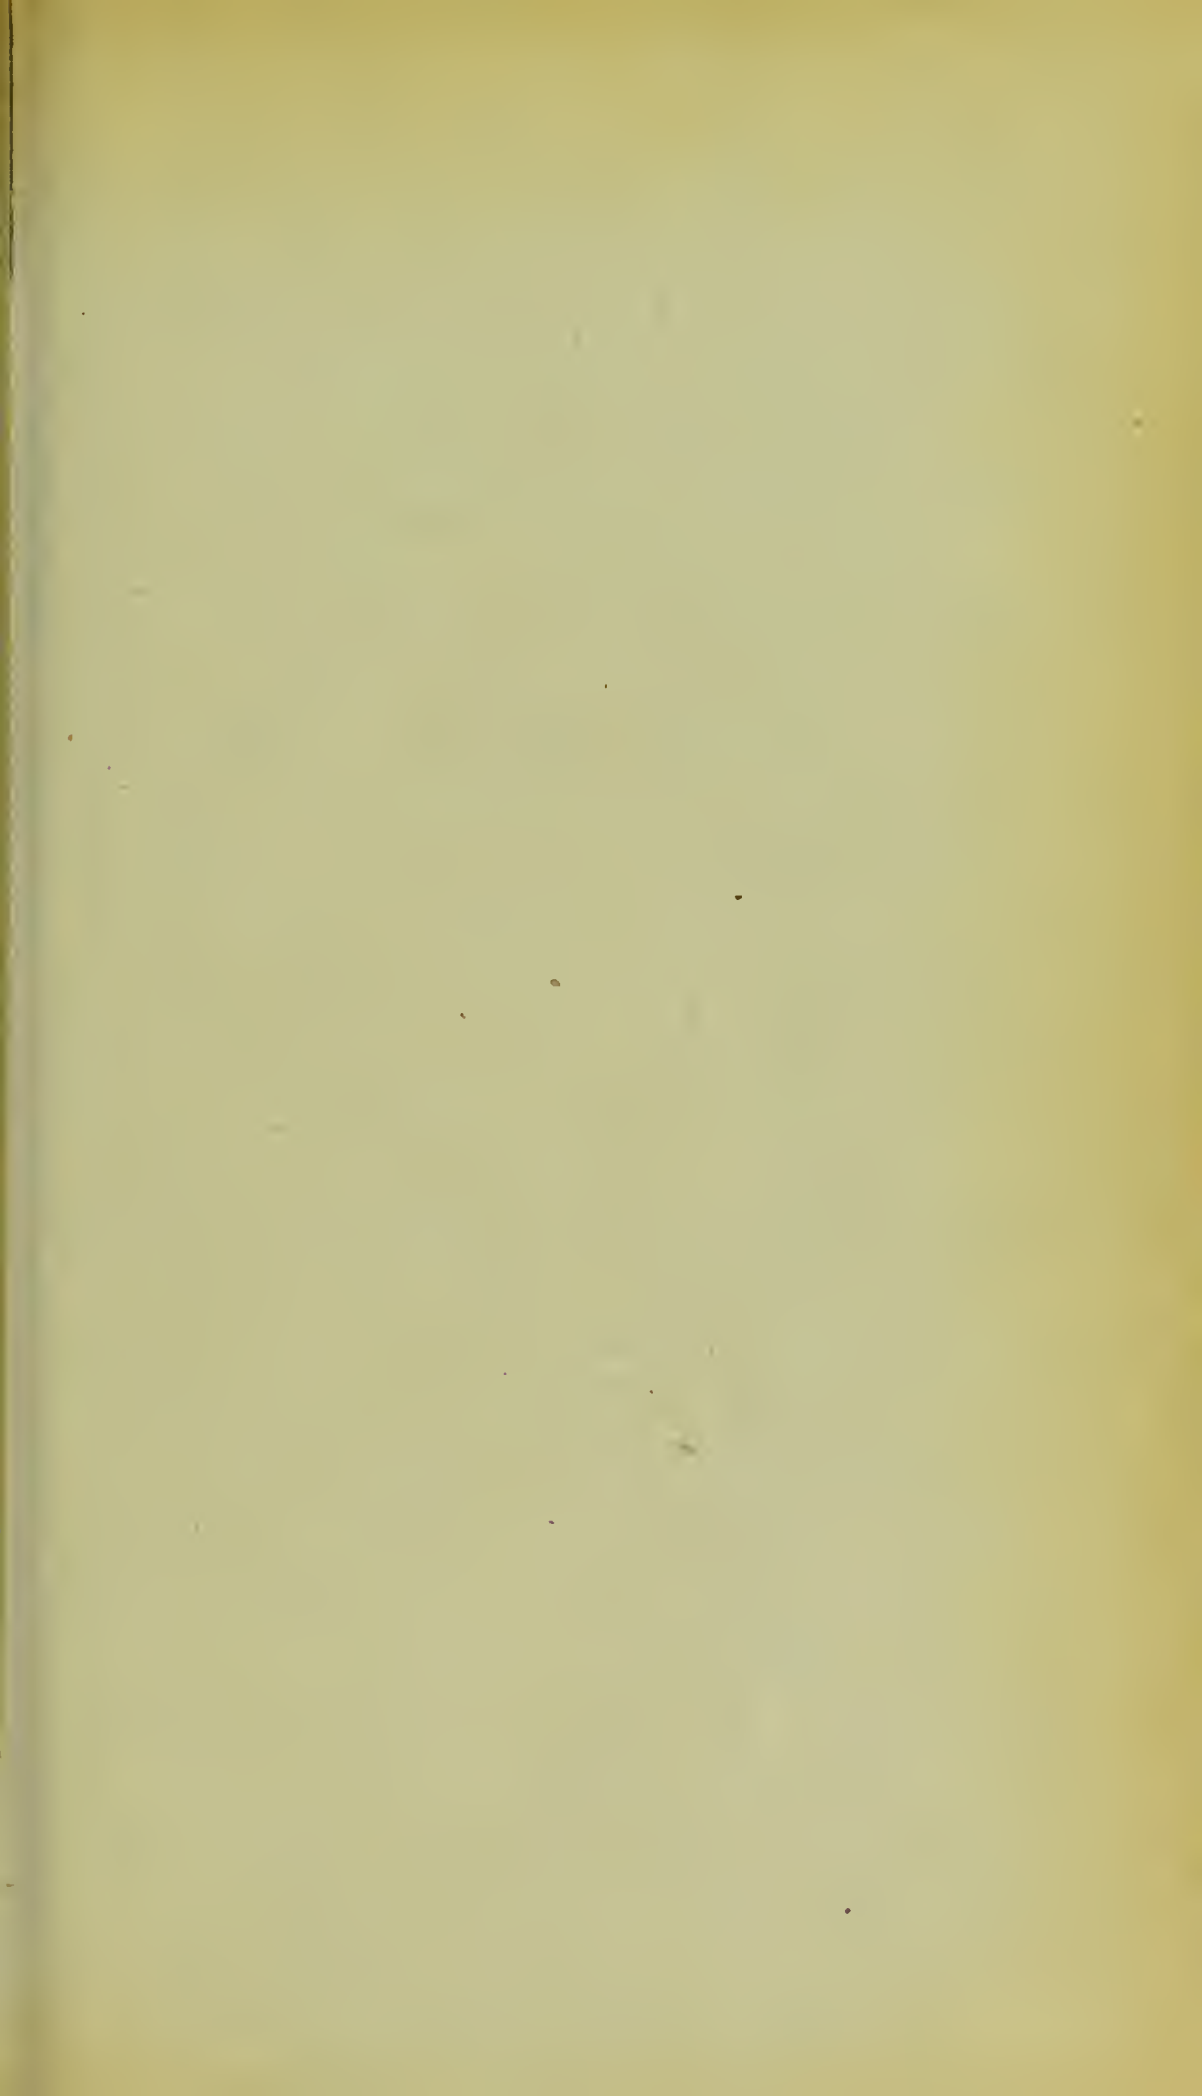

It gives me very great pleasure to bear testimony to the high attainments of DR. J. CAMPBELL M'CLURE as a Physician and a Clinical Teacher.

I have known Dr. M'Clure intimately since he began his medical studies, and he was brought into daily contact with me during the year he acted as House-Physician and House-Surgeon in the Western Infirmary. His career has been one of gradual and steady progress, and his training from the beginning has been such as would qualify him in a special manner to fulfil the duties of Visiting Physician. Not only has he had the experience of general work, but he studied for nine months in Berlin, and spent two years and a half as Resident Physician in a Fever Hospital.

Dr. M'Clure graduated M.B. in 1896 and M.D. in 1909. In 1902 the Managers of the Western Infirmary appointed him as one of the Physicians in the Dispensary Staff, and about the same time he was selected as Clinical Assistant to Professor Samson Gemmell in his Wards. Dr. M'Clure's experience of clinical teaching is large and varied. Not only has he been Clinical and Systematic assistant to Professor Gemmell, but he has taken full charge of his Wards in his absence.

Dr. M'Clure will present testimonials from prominent members of the profession who can speak of his scientific attainments, and if the Managers of the Victoria Infirmary appoint him to the post which he now seeks, I am sure that he will devote himself to the best interests of the Institution.

D. J. MACKINTOSH.

9 NEWTON PLACE,
GLASGOW, W., *May 29th*, 1909.

LADIES AND GENTLEMEN,

The accompanying testimonials, which I have unexpectedly received from some past and present members of my classes at the Western Infirmary and the University, have arrived too late to be included amongst those which I sent out with my application, and I accordingly send them on now as a supplement to my original list.

I have the honour to be,

LADIES AND GENTLEMEN,

Your obedient Servant,

J. CAMPBELL M'CLURE.

*From the RESIDENT MEDICAL STAFF of the Western
Infirmary, Glasgow.*

WESTERN INFIRMARY,
May 29th, 1909.

THE undersigned, at present residents in the Western Infirmary, desire to present a testimonial in favour of DR. J. C. M'CLURE, who is an applicant for the post of Visiting Physician to the Victoria Infirmary.

Most of us have come in contact with Dr. M'Clure as students in Professor Samson Gemmell's Clinique, and know him as an efficient teacher with the gift of clear expression, and, as far as we are able to judge, a clinician of insight and experience. In his work as Dispensary Physician he showed the same characteristics, and both in the Dispensary and in the Wards treated his students with courtesy and painstaking consideration. In particular, he gave frequent demonstrations of outdoor cases on Saturday mornings, and those who attended found them of much value, partly in connection with their examinations, but more specially as regards their acquaintance with medicine in general.

We consider that Dr. M'Clure has great capabilities as a teacher, and an excellent record of teaching accomplished.
